01 / FOUNDATION

Basic | ₹29,990

For learners building a foundation in market analysis, trade planning and money management.

01 Stock screening

Screeners for stock selection, including the multibagger screening module.

02 Average trading & BTST

The reference syllabus's average-trading and Buy Today, Sell Tomorrow module.

03 IPO analysis

Analysis of initial public offerings.

04 Fundamental analysis

Foundational study of businesses and their financial performance.

05 Basic technical analysis

Candlestick anatomy, price action, support/resistance and chart patterns. Moving averages, MACD and RSI.

06 Options strategies: basics

An introduction to options strategies and payoff concepts.

07 Intraday strategies

Intraday setups, entry/exit planning and chart-based decision making.

08 Gap-up & gap-down strategies

Opening-market gaps and strategies for the first 15 minutes.

09 Money management

Position sizing, stop-loss rules, risk/reward and a disciplined pre-trade checklist.

02 / SPECIALIST

Pro | ₹49,990

For learners ready to study additional markets, hedging, systematic trading and specialist setups.

01 **Commodity market**
Gold, silver, crude oil and natural gas on MCX.

02 **Options hedging**
Using options to manage market exposure and understand hedged positions.

03 **Algo trading & backtesting**
Evaluate strategies using win rate, drawdown, profit factor and risk/reward.

04 **Forex trading**
Currency pairs, market sessions and risk control.

05 **Algo trading**
Move from a trading idea to defined rules, code, testing and live execution concepts.

06 **Time cyclic analysis**
Time-cycle methods as a component of market analysis.

07 **Covered call strategy**
Covered-call structure and payoff analysis.

08 **Reversal trading**
Trend reversals and patterns such as head and shoulders.

09 **Supply & demand**
Identify zones and plan entries around price reactions.

10 **Day reversal & expiry trading**
Day-reversal setups, expiry-day behaviour, theta decay, Gamma spikes and 0-DTE concepts.

03 / COMPLETE CURRICULUM

Master | ₹69,990

The complete pathway: both course curricula, advanced hedging, Gamma theory and one-to-one classes.

List ₹79,990 • Save ₹10,000 (12.50%)

01 All Basic modules

The 9 foundation modules on page 3: screening, BTST, IPOs, fundamentals, technical analysis, basic options, intraday, gaps and money management.

02 All Pro modules

The 10 specialist modules on page 4: commodities, forex, options hedging, covered calls, algorithms, backtesting, time cycles, reversals, supply/demand and expiry trading.

03 Advanced hedging & Gamma theory

Advanced hedging study and Gamma-focused options analysis. The reference material also introduces Delta, Theta and Vega alongside Gamma.

04 One-to-one classes

Individual classes alongside the complete curriculum.

SUPPORTING STUDY TOPICS

Inside the modules

The topic illustrations expand the course modules into the study areas below. Master includes both sets.

BASIC / CHARTS & TOOLS

Trading-desk setup, screeners and indicators; candlestick OHLC, bodies and wicks; support, resistance and breakouts; triangles, flags and wedges; moving averages, MACD and RSI.

BASIC / MARKET READING

Sector rotation and stock screening; bid/ask, spread, liquidity and order flow; volume profile, point of control and VWAP; index trading.

BASIC / OPTIONS & RISK

Option-chain reading: open interest, PCR and max pain. Risk/reward, stops, position sizing and the pre-trade checklist, including avoiding revenge trading.

PRO / STRATEGIES & ANALYSIS

Fibonacci retracements and extensions alongside time-cycle study; reversal patterns; supply/demand zones; iron-condor, straddle and covered-call payoff analysis.

PRO / SYSTEMATIC TRADING

Idea → rules → code → backtest → live-execution concepts. Strategy assessment through win rate, maximum drawdown, profit factor and average risk/reward.

MASTER / ADVANCED OPTIONS

Advanced hedging and Gamma theory, with the options-Greeks context of Delta, Gamma, Theta and Vega. One-to-one classes accompany the complete curriculum.
